PRECAUTIONARY STATEMENTS

FIRST AID
IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to do swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. In cases of eye irritation, rinse slowly and gently with water for 1-2 minutes. Call a poison control center or doctor for treatment advice.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Do not apply to humans, their clothing or bedding. Do not allow children or pets to contact treated surfaces until spray has dried. Do not contaminate food or use on household pets. Cover fish tanks prior to application. Do not apply this product in patient rooms while occupied or in any rooms while occupied by the elderly or infirm. Do not apply to classrooms when in use. Avoid contamination of food, feedstuffs, or water supply. Do not contaminate food preparation surfaces, kitchen utensil, dishes, or feed storage containers. Any food/feed contact surfaces and cooking utensils in the treatment area should be covered during treatment or thoroughly cleaned before using. Do not spray where electrical short circuits might result, such as wall outlets, conduits, etc.

ENVIRONMENTAL HAZARDS
This product is extremely toxic to fish and aquatic invertebrates. Remove from premises or tightly cover fish tanks and disconnect aeration systems when applying indoors where such containers are present. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from treated areas. Do not apply to water service areas. Do not contaminate water when disposing of equipment wash waters. Apply this product only as specified on this label.

FOR CONTAINERS GREATER THAN 5 GALLONS: Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other water unless in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) permit and permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your state Water Board or regional Office of EPA

FOR USE IN:
Apartments, Calves, Calving Pens and Parlors, Calving Pens and Parlors, Campgrounds, Empty Chicken Houses, Dairy Areas, Dog Kennels, Food Storage Areas, Grain Mills, Granaries, Hog Barns, Homes, Horse Barns, Hospitals, Hotels, Meat Packing Plants, Food Processing Plants, Millrooms, Motels, Nursing Homes, Rabbit Hives, Resorts, Restaurants and other Food Handling Establishments, Schools, Supermarkets, Transportation Equipment (Buses, Boats, Ships, Trains, Planes), Utilities, Warehouses, Commercial and Industrial Buildings.

the proper amount of CY-KICK CS. When emptying the bottles, triple rinse with water, shake well and add the rinseate to the spray tank. Add the rest of the water and agitate the sprayer thoroughly. Apply product during daylight hours when using to ensure even coverage. Shake or re-agitate sprayer if spraying is interrupted or if dilution is left in the spray orb. If spray screens are used, they should be 30 mesh or larger.

The higher rate should be used for clean-outs, for longer residual effects and for for high insect infestations. The higher rate should be used for clean-outs, for longer residual effects and for for high insect infestations.

INDOOR TREATMENTS

Dilute CY-KICK CS to 0.05% or 0.1% with water using the spray dilution chart.

CY-KICK CS should be used as a Crack and Crevice® product for control or for high insect infestations. Make spot and/or Crack and Crevice® applications to any cracks, crevices or voids, such as cracks and crevices, wall voids, areas near openings, around pipes and drains and refrigeration. Repeat the application as necessary, but not more than twice per week. Treatments must be at least 3 days apart.

FLIES: Make spot applications of CY-KICK CS on surfaces where flies rest in the dark at night or frequent during the day, such as window frames, trash cans, trash, garbages and wall surfaces. CARPET BEETLES (Dermestidae): Treat along edges of carpet, under carpet edge, furniture, frame rugs and as a Crack and Crevice application in closets and other sheltering where infested items are stored. Do not treat clothing with this product. Repeat application as necessary, but not more than twice per week. Treatments must be at least 3 days apart.

ANTS: Inject cracks, crevices and voids where ants may be traveling and/or feeding (including but not limited to: around doors, window frames, and other structural cracks, crevices and voids. Spot treat walls as necessary. Store Food areas

STORAGE AND DISPOSAL

Do not dispose of water, feed or food storage or disposal.

STORAGE: Store in original container in secure dry storage area. Prevent cross-contamination with other pesticides or fertilizers. Do not allow animals to have UNCONTROLLABLE WASTE: Do not dispose of water, feed or food storage or disposal.

CONTAINER DISPOSAL (1 gal.): Empty container by using the product in accordance with the label directions. Do not re-use container. Place empty container in trash or recycle for on available-

PEST DISPOSAL: Pesticide is considered a hazardous waste if it is used in a manner or for a purpose that is not intended by the manufacturer or by the person who distributes the product, or is allowed by State and local authorities, by burning. If exposed to any trails, inside or outside around doors and windows, and other places where ants enter the building. The area may include, but are not limited to, attics, crawl spaces, ceilings, garages, soffits, walls, voids, weep holes, and other void areas. Where possible, treat near ant and termite nesting areas. Repeat application as necessary, but not more than twice per week. Treatments must be at least 3 days apart.

BEES, WASPS and YELLOW JACKETS: As a preventative or remedial treatment to help prevent these insects from building nests or workers from congregating on structures, follow perimeter treatment directions under outdoor section of label. Pay particular attention to soffit and eave areas. For treatment of a yellow jacket or wasp nest, liberally treat the nest, inside the nest for 1 to 2 days and outside boundary area. For treatment of nests inside wall voids, inject into the nest sufficient quantity to treat the complete nest. More than one point of application may be required. Most applications should require no more than half a gallon of diluted material. Pay particular attention to what the material may be electrical wiring. Do not use where there is a shock hazard.

CY-KICK CS DOES NOT PROVIDE INSTANT KNOCKDOWN: The BEST TIME TO TREAT CRACKS and CREVICES is IN THE DAY. The INSECT SHOULD BE DEAD IN 2-3 DAYS. DEPENDING ON THE SITUATION, PROTECTIVE EQUIPMENT FOR THE APPLICATOR MAY BE REQUIRED.

WOOD-destructIVE INSECTS

LOCALIZED TREATMENT OF WOOD-INFESTING INSECTS - Beetles and Borers (such as the following families): Anobiidae, Bostrichidae, Buprestidae, Cerambycidae, Lyctidae, Oedemeridae, Scolytidae and Saxeidae. Beetles, Flies, Moths, Rats, Mice, Raccoons, Wolves, Foxes, Bears, Minks, and Skunks. Do not treat clothing with this product. Repeat application as necessary, but not more than twice per week. Treatments must be at least 3 days apart.

ANTS: Inject cracks, crevices and voids where ants may be traveling and/or feeding (including but not limited to: around doors, window frames, and other structural cracks, crevices and voids. Spot treat walls as necessary.

STORED PRODUCT PESTS (EXPOSED ADULT AND IMMATURE STAGES): Before storing products, treat a band of soil 6 to 10 feet wide around and adjacent to the building. Also treat the building foundation to a height of 2 to 3 feet where pests are active and may find entrance. Treat other insect entry points such as doors, windows, under siding and eaves of structure. CY-KICK CS may be applied in compressed air, backpack or power sprayer equipment. An application rate of 0.5 to 1.0 fluid ounces of CY-KICK CS per 100 sq. ft. is desirable. Apply in sufficient water to adequately cover the area being treated and may be applied to lactating or feed animals. Do not contaminate milk, food or water. Avoid all contact with skin or mucous membranes. Do not contaminate milk, food or water. Apply only to feed or food storage areas. Do not contaminate milk, food or water. Apply only to feed or food storage areas.

PERIMETER TREATMENT: For control of other pests and to help prevent infestations of buildings, treat a band of soil 6 to 10 feet wide around and adjacent to the building. Also treat the building foundation and the sides where pests may be entering and may find entrance. Treat other insect entry points such as doors, windows, under siding and eaves of structure. CY-KICK CS may be applied in compressed air, backpack or power sprayer equipment. An application rate of 0.5 to 1.0 fluid ounces of CY-KICK CS per 100 sq. ft. is desirable. Apply in sufficient water to adequately cover the area being treated and may be applied to lactating or feed animals. Do not contaminate milk, food or water. Avoid all contact with skin or mucous membranes. Do not contaminate milk, food or water. Apply only to feed or food storage areas. Do not contaminate milk, food or water. Apply only to feed or food storage areas.
