FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

FUSILADE® DX Herbicide

EPA REG. NO. 100-1070
EPA SLN NO. WA-040024

Fine Fescue Grasses (Chewings, Hard, And Creeping Red Varieties)
Grown For Seed Use Only.

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR PEST CONTROL, CROP INJURY, OR ILLEGAL RESIDUES.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Follow all applicable directions, restrictions, and precautions including statements pertaining to the Worker Protection Standards, on the EPA-registered Fusilade DX Herbicide label.

This label must be in the possession of the user at the time of application.

For control of downy brome (cheatgrass) (Bromus tectorum), quackgrass (Agropyron repens), bentgrass (Agrostis sp.), and volunteer cereals in Fine Fescue Grasses (such as Creeping Red, Chewings and Hard Fescue varieties) grown for seed in Washington. NOT FOR USE ON TALL FESCUE. Refer to the federal label for a complete listing of grass weeds controlled.

Fall Application - Apply FUSILADE DX at 8 oz. per acre to actively growing downy brome in the 2 to 4 inch stage. Apply at 12 to 16 oz. per acre to actively growing quackgrass or bentgrass in the 6 to 10 inch stage. Make a second application of 12 to 16 oz. per acre on the perennial grasses before they reach 10 inches of regrowth.

Spring Application - Apply FUSILADE DX at 8 to 16 oz. per acre to actively growing grasses. Downy brome in the 2 to 4 inch stage can be controlled by the lower rate but larger, established grasses (4 to 6 inches) may need the higher rate for adequate control. Use 12 to 16 oz. per acre in quackgrass and bentgrass in the 6 to 10 inch stage and a second application at the same rates before they reach 10 inches of regrowth.

Do Not apply FUSILADE DX after fescue grass seedhead develops into the boot stage.
Environmental Hazards
This pesticide is toxic to fish. Fusilade DX should not be used under this SLN label where impact on listed threatened or endangered species is likely. You may refer to the WSDA Endangered Species Program website at http://agr.wa.gov/PestFert/EnvResources/EndangSpecies.htm, or contact the Washington Department of Fish & Wildlife, National Marine Fisheries Service (NOAA Fisheries) or US Fish & Wildlife Service for information regarding aquatic species listed as threatened or endangered. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.

WSDA Container Disposal Guidance: Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the internet from WSU at http://pep.wsu.edu/waste/wd.html or from WSDA at http://agr.wa.gov/PestFert/Pesticides/WastePesticide.htm. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

Chemigation: For use under this SLN label do not apply this product through any type of irrigation system.

This label for Fusilade DX expires and must not be distributed or used in accordance with this SLN registration after December 31, 2009.
