PLEASE READ THE LABEL COMPLETELY BEFORE USE

MAXIM®

FUNGICIDE
ACTIVE INGREDIENT: MAXIM contains 100 g/litre FLUDIOXONIL in the form of a suspension concentrate.

For the treatment of Potato seed tubers for the control of Rhizoctonia (Stem Canker and Black Scurf) and Silver Scurf.

Pack size: 1 litre

Registered pursuant to the Pesticides Act 1979 No. 4339.

Syngenta Crop Protection Limited
Tower 2, Level 7, 110 Symonds Street, Auckland

UN – 3082 ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (Contains: fludioxonil 10%) MARINE POLLUTANT PACKING GROUP III, HAZCHEM 2X

In a transport emergency dial 111, Police or Fire Brigade. For specialist advice in an emergency only, call 0800 734 607 (24 hours).

PRECAUTIONS
Keep out of reach of children.
Store in original container away from foodstuffs.
Avoid contact with skin and eyes and inhalation of spray mist.
When mixing or applying wear waterproof gloves.
Wash thoroughly after use.

Container disposal: Triple rinse empty container and add residue to spray tank. Flatten and burn if circumstances, especially wind direction permit, otherwise bury in a suitable landfill.
Avoid contamination of any water supply with chemical or empty container.

Treated seed. Seed treated with MAXIM must NOT be used for human or animal consumption and containers holding treated seed must be labelled accordingly.

GENERAL INFORMATION
MAXIM is a seed treatment for direct application to potato seed tubers for the control of Rhizoctonia solani (Black Scurf and Stem Canker) and Silver Scurf. The control of Silver Scurf may not be adequate if the resultant crop is left for any length of time either in the ground following haulm death, or in cool storage.

STORAGE
Store in a cool, dry place, avoiding temperatures below -10°C and above 35°C.

WARRANTY
This formulation is warranted to contain the specified active ingredient within accepted analytical tolerance when packed. The user bears the risk for damage resulting from factors beyond the manufacturer's control. The manufacturer declines all liability for damage resulting from improper storage or use of the product.

®MAXIM is the registered trademark of a Syngenta Group Company.

<tr>
<td>Potatoes</td>
<td><em>Rhizoctonia</em></td>
<td>250 ml in a maximum of 2.75 litres of water /tonne of seed tuber potatoes.</td>
<td>Ensure that an even distribution of MAXIM over the seed is achieved. <strong>Note:</strong> Use only sufficient water to give complete coverage, as higher volumes may give rise to bacterial soft rots during storage before planting. Once potato seeds have been treated avoid prolonged delay in planting the treated seed. Apply as a spray to seed tubers before planting, ensuring complete coverage of the tubers as they rotate across the roller tables. Ensure that the tubers are free of soil and that the spray mixture is uniformly mixed during application.</td>
