### Re: TETRACONAZOLE.

Freedom of Information Office (A-101),  
1200 Pennsylvania Ave., NW.,  
Washington, DC 20460-0001.

This FOIA request is for the following documents:

In a December 21, 2005, Federal Register, "Pesticide Product Registrations; Conditional Approval" available at <http://www.epa.gov/fedrgstr/EPA-PEST/2005/December/Day-21/p7500.htm> it was stated

**"a copy of the approved label, the list of data references, the data and other scientific information used to support registration**, except for material specifically protected by section 10 of FIFRA, are also available for public inspection. Requests for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A-101), 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001. The request should: Identify the product name and registration number and specify the data or information desired."

My FOIA is for the information stated in the above for the following two pesticide products:

Product Name: Tetraconazole Technical, (EPA File Symbol: 60063-RR).  
EPA Registration Number 60063-11.  
Active ingredient: Tetraconazole: at 97.0%. The application for the product Tetraconazole Technical was approved for manufacturing or formulating purposes on April 14, 2005, to use for formulation into end-use products for use on sugar beets

Product Name: Eminent 125SL Fungicide, (EPA File Symbol: 60063-RE).  
EPA Registration Number 60063-12.  
Active ingredient: Tetraconazole: at 11.6%. The application for the product Eminent 125SL was approved on April 14, 2005 for the control of Cercospora leaf spot and powdery mildew disease of sugar beets

In the same Federal Register document, the following was stated

The Agency has considered the available data on the risks associated with the proposed use of tetraconazole, and information on social, economic, and environmental benefits to be derived from such use. Specifically, the Agency has considered the nature and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of tetraconazole during the period of conditional registration will not cause any unreasonable adverse effect on the environment, and that use of the

pesticide is, in the public interest.

I request the review documents that these determinations were based on.

Lastly, I request the following Cleared Science Reviews for Tetraconazole (cited at <http://www.epa.gov/opppmsd1/foia/reviews/120603.htm>):

October 5, 1999. Memorandum. 135 Pages.  
Sanjivani Diwan. Health Effects Division.  
Cancer Assessment Review Committee Meeting on  
Tetraconazole. (Tetraconazole: Evaluation of the Carcinogenic Potential).  
MRID 44305304...

December 9, 1999. Memorandum. 25 Pages.  
Sanjivani Diwan. Health Effects Division.  
Review of Draft Cancer Assessment Document on Tetraconazole.

January 11, 2000. Memorandum. 26 Pages.  
Sanjivani Diwan. Health Effects Division.  
Tetraconazole - Report of the Cancer Assessment Review Committee.  
Tox review 013948.

I have no affiliation with any commercial interest in this or any other pesticide.

I am requesting these documents under FOIA to enable relevant comments to be submitted to EPA on the pesticide Tetraconazole.

Sincerely,

Ellen Connett  
Director,  
Fluoride Action Network Pesticide Project.
