

# MEMORANDUM

**DATE:** July 27, 2014  
**TO:** City Council  
**Cc:** Bill Bell, City Manager, Rob Joseph, Assistant City Manager, Lisa DelPiccolo, City Clerk  
**FROM:** John Harris, Public Works Director  
**RE:** July 2014 Project 7 Board Meeting Update

---

I attended the Project 7 board meeting on July 24, 2014. Although Montrose continues to consume approximately forty-four percent (44%) of all P7 treated water delivered, consumption is down approximately nineteen percent (19%) during the month (June 2014 vs. June 2013). 2013 consumption throughout the system is down significantly from the seven year average. Consequently, revenues from treated water sales are down significantly. However, Adam Turner (P7 Director) is managing monthly expenses.

The Board briefly discussed its direction to end fluoridation of drinking water. The practice of fluoridation will end on July 31<sup>st</sup>. A press release was issued in early July and an article ran in the Montrose Daily Press soon after.

Due to conflicting meeting and travel schedules, the Board voted to cancel the August 2014 meeting.
