Nominations to the Report on Carcinogens and Office of Health Assessment and Translation; Request for Information

SUMMARY: National Toxicology Program (NTP) Office of the Report on Carcinogens (ORoC) and Office of Health Assessment and Translation (OHAT) request information on nine substances, mixtures, and exposure circumstances (collectively referred to as “substances”). Six substances are nominated for possible review for future editions of the Report on Carcinogens (RoC). Three substances are being considered by OHAT for evaluation of non-cancer health outcomes.

DATES: Deadline for receipt of information is November 6, 2015.

ADDRESSES: Information on substances for possible review for the RoC should be submitted electronically on the ORoC nominated substances page (http://ntp.niehs.nih.gov/go/rocom) or to lunn@niehs.nih.gov. Information on OHAT nominations can be submitted electronically on the OHAT nominated topics page (http://ntp.niehs.nih.gov/go/763346) or to thayer@niehs.nih.gov.
Background Information on OHAT: On behalf of NTP, OHAT conducts literature-based evaluations to assess the evidence that environmental chemicals, physical substances, or mixtures (collectively referred to as “substances”) cause adverse non-cancer health outcomes. As part of these evaluations, NTP may also provide opinions on whether these substances might be of concern for causing adverse effects on human health given what is known about toxicity and current human exposure levels.

Dated: October 1, 2015.

John R. Bucher,
Associate Director, National Toxicology Program.
