Dear Dr. Zucker:

Honeywell would like to meet with you as soon as possible to offer our assistance for a program for private wells in the Town of Hoosick and the Village of Hoosick Falls that complements the testing being offered by public agencies and the work being done by Saint-Gobain Performance Products. A meeting in Albany early next week would be ideal.

We have engaged ERM, a well-recognized environmental consulting firm with considerable expertise at sites where perfluorooctanoic acid (PFOA) is the primary contaminant of concern.

Late last year, Honeywell learned of the discovery of PFOA in the Village of Hoosick Falls public water supply. We understand that Saint-Gobain has been supplying bottled water to potentially affected residents and is working with state and local governments to install upgrades to the drinking water treatment system.

Honeywell is doing a review to understand the historic operations by our predecessor, AlliedSignal Laminated Systems Inc., which operated in Hoosick Falls between 1986 and 1996. We have met with Saint-Gobain and also spoken to counsel for the Healthy Hoosick Water group, and your General Counsel Richard J. Zahnleuter.

Our initial review indicates that our predecessor, AlliedSignal Laminated Systems, operated processing facilities at locations in, or around, Hoosick Falls. After selling the business in 1996, AlliedSignal Laminated Systems conducted several site investigations and received "No Further Action" letters from the New York State Department of Environmental Conservation. Regulations did not require testing for PFOA at the time.

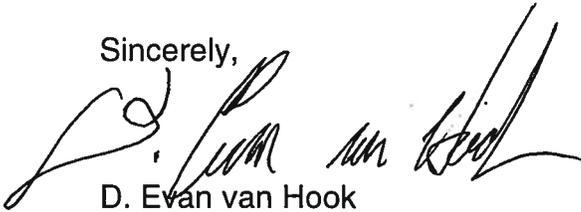

Of course, we recognize that a voluntary program to address the private wells is a first step and that further investigations into the presence of PFOA and additional remedial

actions may be required. But this should not delay the immediate actions that we can take now to secure the water supply of residents who rely upon private wells.

We would like to arrange a meeting as soon as schedules can be arranged to discuss how best to proceed. Thank you.

Sincerely,

A handwritten signature in black ink, appearing to read "D. Evan van Hook". The signature is fluid and cursive, with a large initial "D" and a long, sweeping underline.

D. Evan van Hook
