Subject: Re: Fluoropolymer ECA Drafting Committee

As per your request and attached to this e-mail is an electronic copy of the incineration ECA on fluoropolymers in WordPerfect format. I think it will be very helpful to receive David's comments as a redline markup and I look forward to our discussions on Monday.

Since you folks are able to use WordPerfect, I would like to receive copies of the appendices for the fluoropolymer and telomer ECAs in WordPerfect format as well. In this way it might be easier to move things along during future teleconference discussions.

Robert: Were you planning to update the appendices for both the fluoropolymer and telomer ECAs as per our recent discussions? Could you have this available by Friday? I'm still a bit confused about whether you are planning to modify the ASTM procedures or re-write them as separate attachments. Whatever the decision, we need to begin our review of these materials soon.

David: I am concerned about leaving the telomer folks out of discussions to review the boilerplate ECA language. Yet it also seems a lot of duplication of effort to generate a separate ECA for the telomer folks to comment on given that so few things will change between the documents once agreement is reached on the boilerplate language. Do you think it would be acceptable to share the fluoropolymer document with Bill Beers and Steve K. ?? I think we would all benefit from their input early on.
