Subject: Section IX language

Rich:

Here is the language that we want as the "space holder" in Section IX for the GLP and QAPP basket of issues:

"[Discussions are continuing on: (a) appropriate tailoring of GLP requirements to meet the special needs of this test program, and (b) a table providing guidance for the development of quality assurance project plans.]"

This "space holder" would appear after line 21 on page 9 of the current draft, in place of everything that appears thereafter in that draft, up to the beginning of Section X.

As we explained in the call, we will not agree to the inclusion of the language currently in the draft after line 21 in any consensus document for distribution to the Technical Working Groups at the end of this week.
