Subject: Re: ACTION item: Incineration ECAs Part IX add in text

Rich:

Daiken, which will be a signatory of both ECAs, has requested to see the completed drafts of both ECA package before making a decision on whether it will agree to having the packages distributed for interested party comment. They have indicated that they will try and expedite their reviews, so as to permit distribution of the packages on Monday, as planned. Accordingly, as soon as the packages are finished, they need to be distributed, either to me for distribution to Daiken, or directly to Mark Greenwood, Daiken's counsel.

The other companies have directed me as follows concerning distribution of the final (i.e., as approved by the drafting committee) packages:

1. DuPont: OK to distribute.
2. Asahi: OK to distribute telomer package; still waiting for OK re fluoropolmer package.
3. Clariant: OK to distribute
4. Dynenon: Still waiting to hear from.

DuPont: OK to distribute

David
