Subject Clarity regarding CBI claims on Trade names for public access

Hi Dr. Nakamura

As we try to incorporate the data you provided in the Feb. 17, 2004 letter, we need clarification on the CBI claims made for the Table 1 of the fluoropolymer section. CAS registry numbers and 9CI Chemical names have been declared as CBI and generic names were provided, which were not claimed as CBI. However, the public accessibility to the accession numbers / trade ID's you provided were inadvertently claimed as CBI which I requested some clarity for. These product Identities should be non-CBI. If, however, these trade names do need CBI protection, I will use the Document Control Number and table cell number for the public reference number.

Please let me know if the trade ID status will be changed from CBI to publically available.

Thanks

Dr. Gregory Fritz
