Subject Re: incineration ECAs 

We're getting closer. Given the number of additional changes that have been made during the sign-off process, the public version of these ECAs has become cumbersome to sort through because each company set of corrected and initialed pages must move into the document / docket together. For the "official" version(s), I propose to electronically incorporate as many changes as possible into Copy 1 and the individual company versions of the document. This will make for a more readable document and make a better presentation when either the Companies or EPA need to reference the document. Since the "official" version(s) don't exist yet I see no reason why we can't make this happen in a virtual world. **Do You concur?**

Here's what I found thus far.

Telomer ECA:

- 1) Clariant made a new change to page 18. This needs to be circulated for initialing.
- 2) Dupont made address correction which needs to be circulated for initialing.

Fluoropolymer ECA:

- 1) AGC did not sign and return their "official" version of the document. (As you remember we had no way of knowing whether the company would have CBI so we left it that each company would receive a "Company" version of the document. We need to fill all the placeholders, even if the Company did not have CBI.)
- 2) Dyneon made chemical name changes that require a conference call to sort out.
- 3) Daikin
 - a) Made an additional change to page 4. This needs to be circulated for initialing.
 - b) They did not return any of the initialed pages. These need to be resent for initialing.
- 4) Dupont needs to initial some of the places where they made address corrections. The appropriate pages need to be resent to Dupont only for initialing.

While this is not rocket science the details have become a big headache. Hope to have things into the mail either by the end of this week or early next.

Subject incineration ECAs

Rich:

Could you update me on where things stand re the incineration ECAs? There is an FMG meeting tomorrow, and I would like to be in a position to provide the gang the latest poop. Thanks.
