EXECUTIVE SUMMARY

The State of Kansas

- In 2010, 18.1% of Kansas children were living in poverty. This represents a 53.4% increase in the percent of children living in poverty compared to 1970.
- In 2010, 47.4% of Kansas children were enrolled in free and reduced school lunch programs.
- In 2010, 37.7% of all births in Kansas were to unmarried parents, compared to 12.2% of all births in 1980. This represents a 209% increase in the percent of Kansas babies born to unmarried parents.
- Since 2000, there has been a 150% increase in the percent of the population enrolled in the state's Supplemental Nutrition Assistance Program (SNAP) and since 2001 a 37% increase in the percent of the population enrolled in Medicaid.
- As they have nationwide, divorce rates in Kansas have decreased from their peak in the early 1980s, but have leveled off and have remained steady since the mid-1990s.
- Several indicators have evidenced significant decreases, including a 53% decrease in the high school dropout rate since 1995, a 64% decrease in the infant mortality rate since 1970, a 32% decrease in the teen pregnancy rate since 1996, a 36.5% decrease in the percent of youth binge drinking since 2000, and a 53% decrease in teen tobacco use since 1998.

Kansas Counties

- Based on the composite index scores, which take into account each county's data across 18 indicators of child and family wellbeing, the Top Ten Kansas counties are:
1) Greeley, 2) Johnson, 3) Trego, 4) Sheridan, 5) Washington, 6) Wallace, 7) Nemaha, 8) Wabaunsee, 9) Lane, and 10) Pottawatomie.
- A high overall ranking does not mean that a given county ranks highly on each individual indicator. Therefore, each county has specific areas that they could target to improve child and family wellbeing.

INTRODUCTION

The health and wellbeing of children and families is vital for a healthy state and nation. The purpose of this report is to provide an overview of state-level trends and a county by county comparison on a number of indicators of child and family wellbeing. This information could aid government officials, policymakers, community leaders, faith organizations, helping professionals, and Kansas citizens understand the state of child and family wellbeing in their local area and assist in helping local communities target specific areas for improving the health of children and families.

Eighteen indicators of child and family wellbeing are included in both the state trend data as well as the county rankings. The eighteen indicators are: child poverty, child care assistance enrollment, divorce, enrollment in free and reduced lunch programs, high school dropouts, infant mortality, lack of maternal education, low birth weight babies, Medicaid enrollment, parental unemployment, out of wedlock births, SNAP enrollment, TANF enrollment, teen pregnancy, uninsured children, youth binge drinking, and youth tobacco use.

Why rank Kansas counties? The ranking system provides an overall picture of the status of each county on these eighteen indicators compared to all other counties in the state of Kansas. This information could be useful to counties when developing policies, programs, and initiatives in order to strengthen children and families in their region.

METHOD

A composite index was developed to compare counties on multiple indicators of child and family wellbeing. *All data are from 2010. Composite index takes all indicators and pools them together giving each county one score that can be compared across counties. First, a standardized (Z)-score was computed for each indicator for each county. To calculate the z-scores, the mean and standard deviation of the measured values for each indicator were gathered across all 105 counties. Lower z-scores represent more desired outcomes. For example, the higher the child poverty rate the higher that county's z-score for that indicator. Second, each county's z-scores across the 18 indicators were averaged to obtain a single z-score for each county. Finally, each county was ranked based on this final, averaged z-score.

*Values for "lack of maternal education" in 2010 were not available, so values in 2009 were used for the 2010 composite index. For indicators including "youth tobacco use," "youth binge drinking," and "high school dropout" some counties did not report data for 2010. We used the most recent year data were reported for each county with missing values for 2010 and these values were computed as part of the composite index.

COMPOSITE INDEX

| RANK | COUNTY | Z-Score |
|------|--------------|---------|
| 1 | Greeley | -0.89 |
| 2 | Johnson | -0.87 |
| 2 | Trego | -0.87 |

STATE LEVEL TRENDS

In addition to the county composite index, we also report state-level trends across the 18 child and family wellbeing indicators. A graph displaying the trend for each indicator is provided as well as a brief discussion of state and county trends, where applicable. Appendix A provides information regarding indicator definitions and data sources. Appendix B provides individual county rankings for the most recent available year for each indicator. Counties with missing data for particular indicators are represented in the table with N/A for not available.

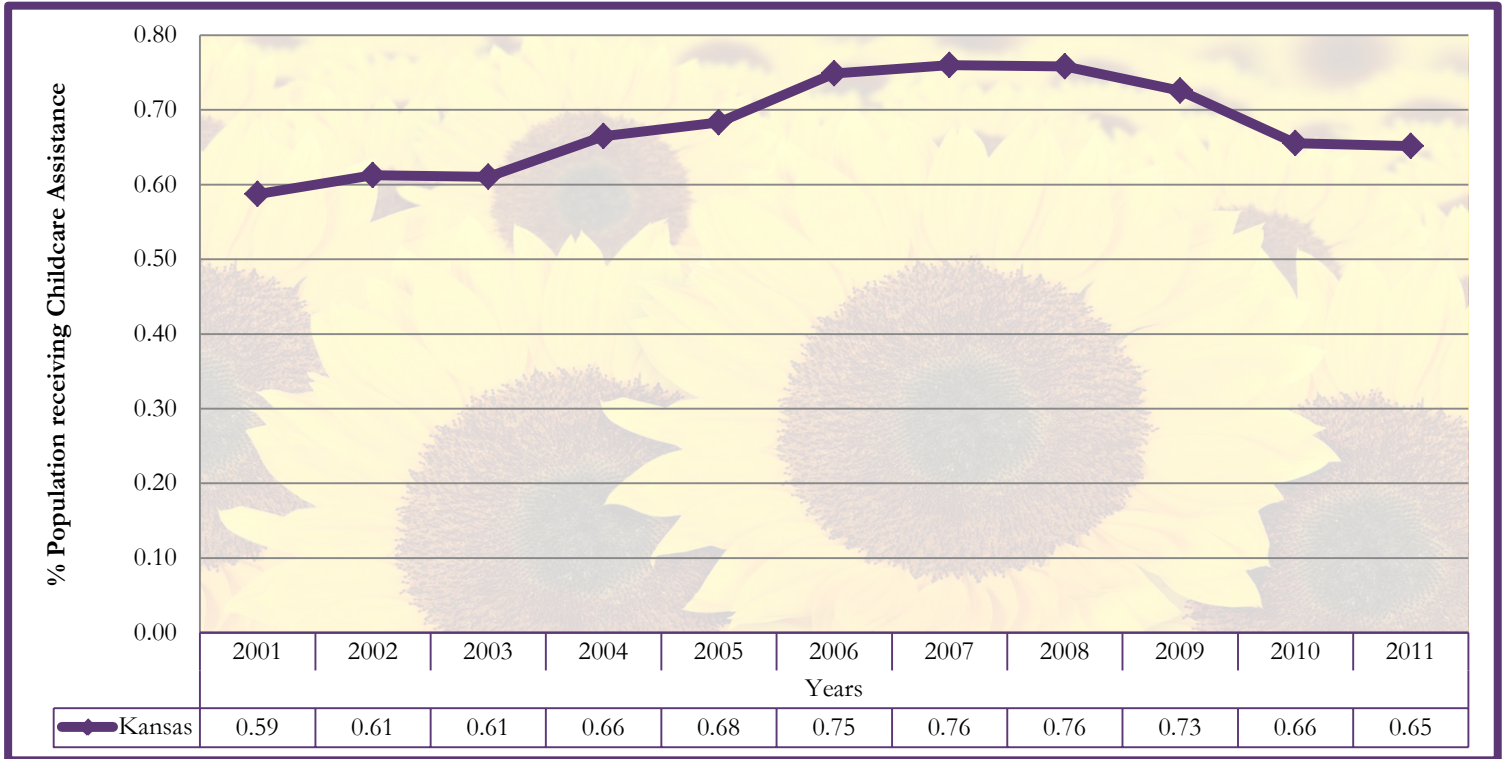

CHILD POVERTY

In 2010, roughly 131,000 or 18.1% of Kansas children lived in poverty. This represents a 53% increase in the percent of children living in poverty compared to 1970, when 11.8% of Kansas children were living in poverty.

County level data were obtained from 1970 to 2010. In 2010, county poverty rates ranged from a low of 7.7% (Johnson) to a high of 34.7% (Wyandotte). See Appendix B1, p. 32. In 2010, the top ten counties with the lowest percent of children living in poverty were Johnson (7.7%), Pottawatomie (11.6%), McPherson (11.9%), Miami (11.9%), Butler (12%), Thomas (12.3%), Jefferson (12.5%), Nemaha (12.6%), Coffey (12.7%), and Gray (12.7%). The average percent of children living in poverty for the top ten counties in 2010 was 11.8%, an 87% increase from the top ten county average of 6.3% in 1970.

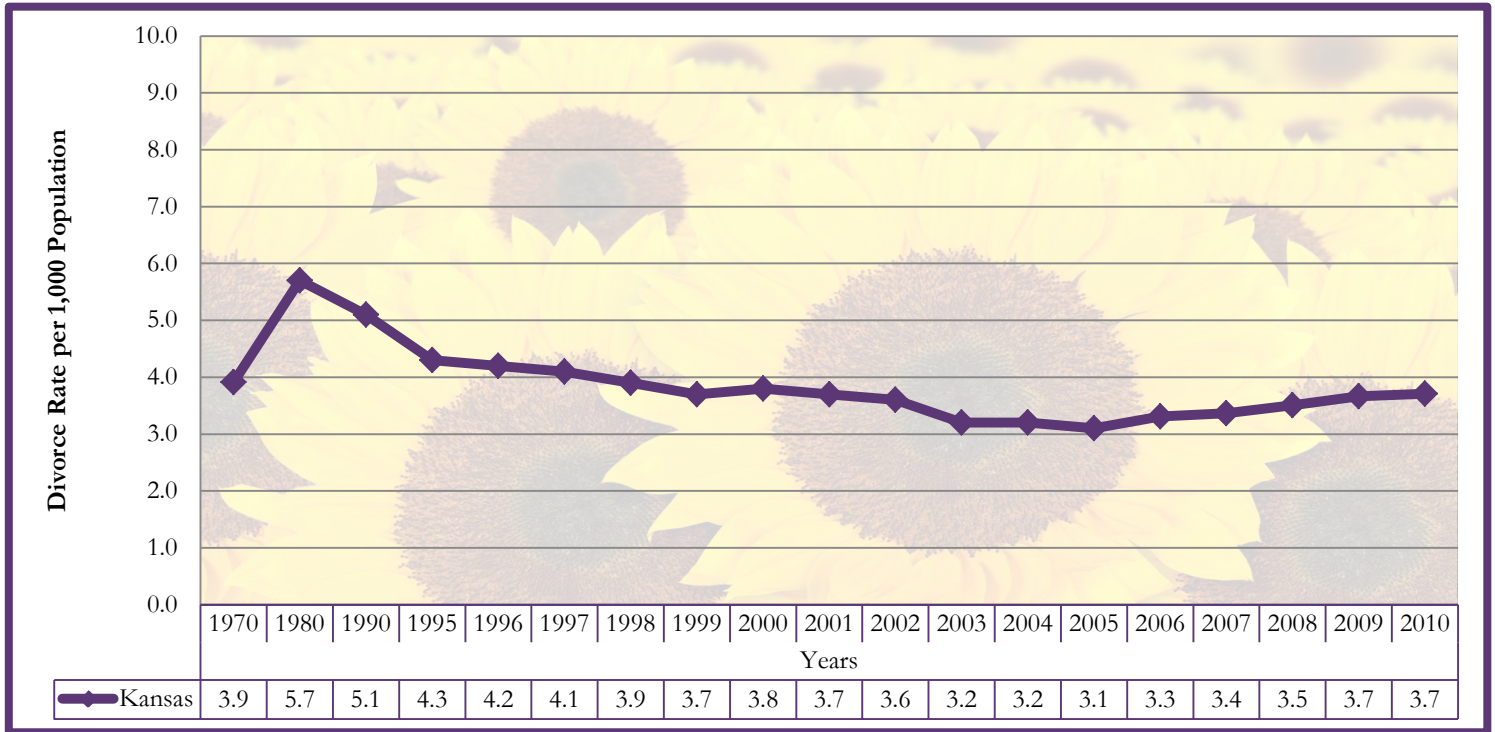

CHILDCARE

Between 2001 and 2011 there was a 16.7% increase in the percent of the population that received Childcare assistance. In 2011, an average of 18,699 individuals received Childcare assistance in Kansas, or 0.7% of the population, and county levels ranged from 0.0% (Lane) to 1.2% (Wyandotte). In 2001, the earliest year with available county level data, an average of 15,820 individuals received Childcare assistance, or 0.6% of the population.

County level data were obtained for the years 2001 to 2011. In 2011, the top ten counties with the lowest child care assistance rates were Lane (0.0%), Greeley (0.0%), Elk (0.1%), Comanche (0.1%), Hamilton (0.1%), Kiowa (0.1%), Rawlins (0.1%), Barber (0.1%), Cheyenne (0.1%), and Chautauqua (0.1%). See Appendix B2, p. 33 for individual county rates.

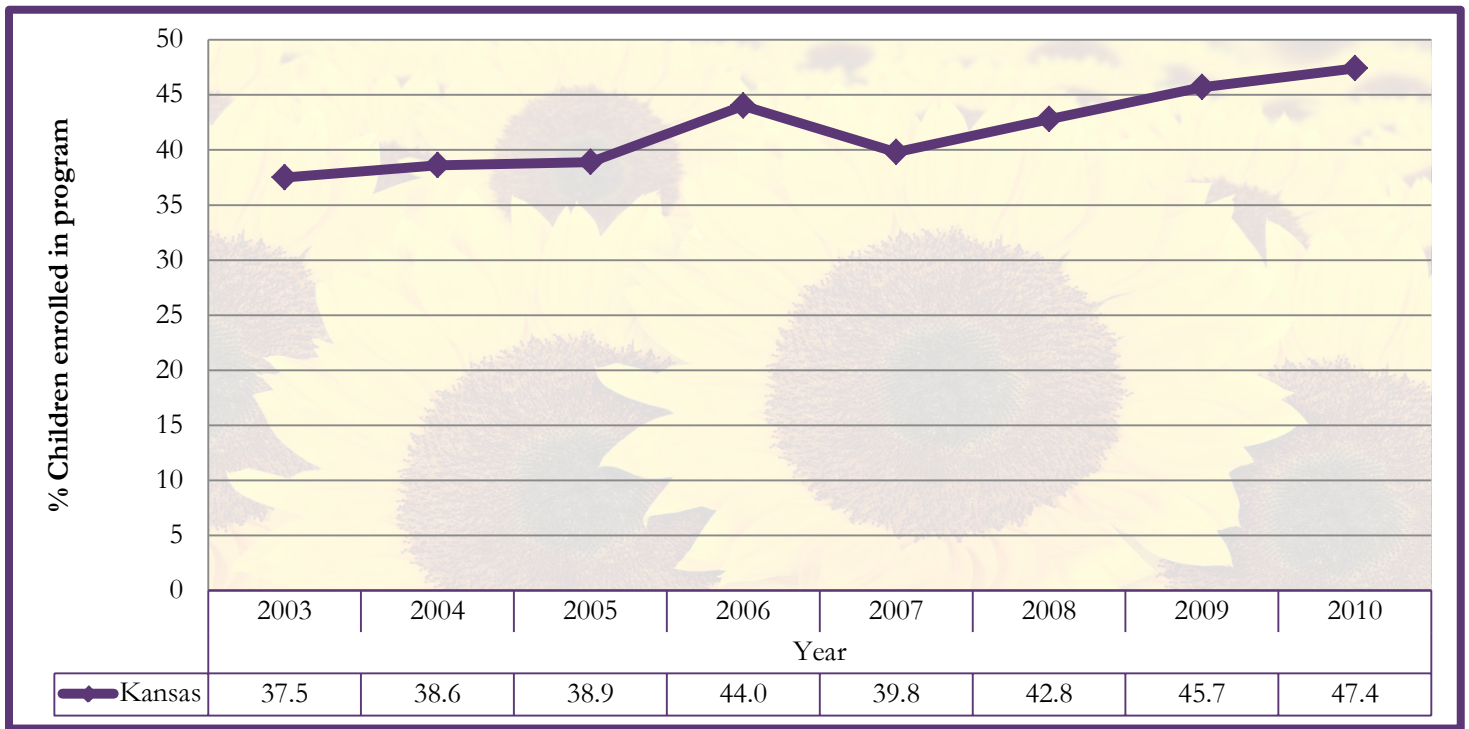

DIVORCE

In 2010, 10,579 divorces and annulments were granted in the state of Kansas, with a state rate of 3.7 per 1,000 people. In 1970, there were 8,785 marital dissolutions (a rate of 3.9 per 1,000 people). This indicates a 5.1% decrease in the state divorce rate between 1970 and 2010. The current rate is down from a high in 1980 of 13,410 divorces and annulments, a rate of 5.7 divorces per 1,000 people; the highest rate reported in our sample. The divorce rate has remained relatively stable since 2000, with the lowest rate occurring in 2005 at 3.1 divorces per 1,000 people.

County level data were obtained from 1970 to 2010. In 2010, county divorce rates ranged from a low of 0.4 (Rawlins) to a high of 14.4 (Coffey) per 1,000 people. See Appendix B3, p. 34 for individual county rates. In 2010, the top ten counties with the lowest divorce rates were Rawlins (0.4), Clark (1.4), Hamilton (1.5), Stafford (1.6), Comanche (1.6), Brown (1.6), Greeley (1.6), Wyandotte (1.7), Washington (1.7), and Chase (1.8). The average rate of divorce for the top ten counties in 2010 was 1.5 per 1,000 people, a 114% increase from the top ten county average of 0.7 in 1970. According to the Kansas Department of Health and Environment (2010), the 25-29 year old age group experienced the largest number of divorces in 2010.

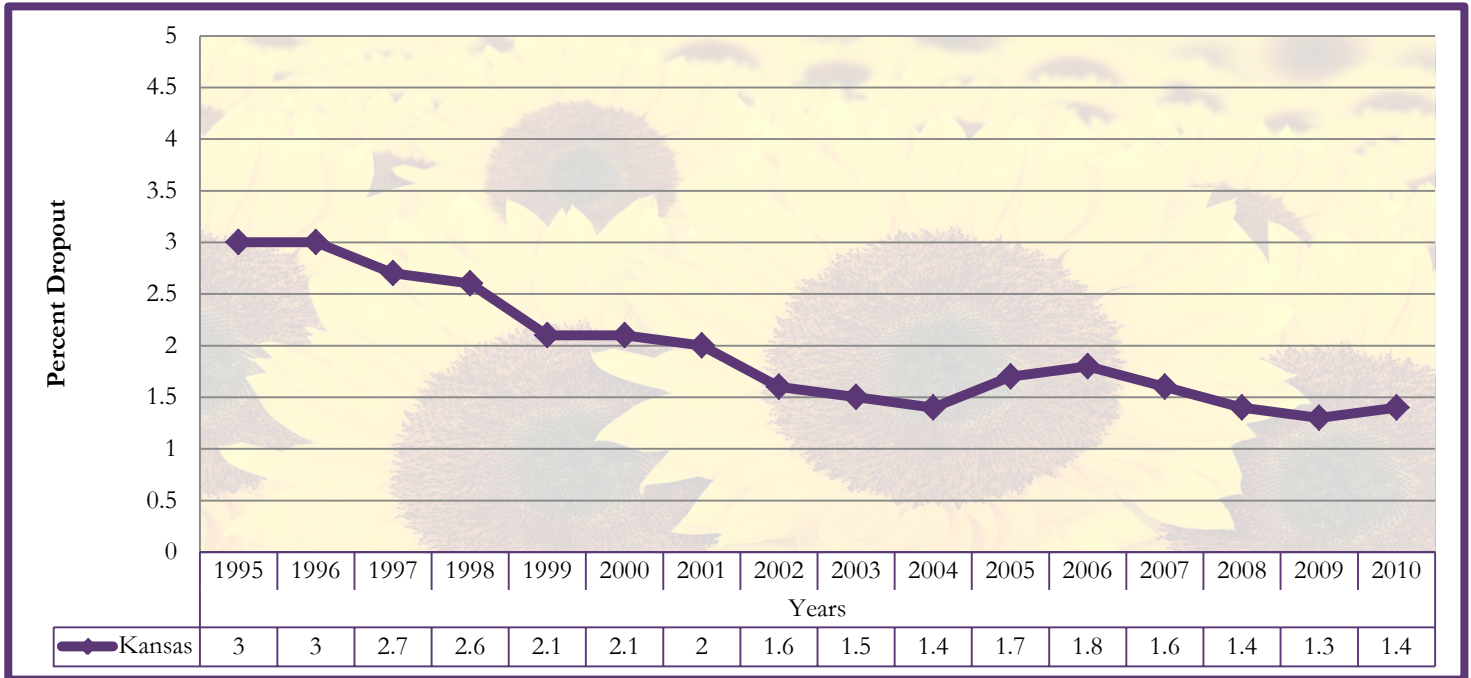

FREE & REDUCED LUNCH PROGRAM

In 2010, the percent of children enrolled in free and reduced school lunch programs in the state of Kansas was 47.4%, up from 37.5% in 2003. This is a 26% increase in enrollment in the free and reduced school lunch program from 2003 to 2010.

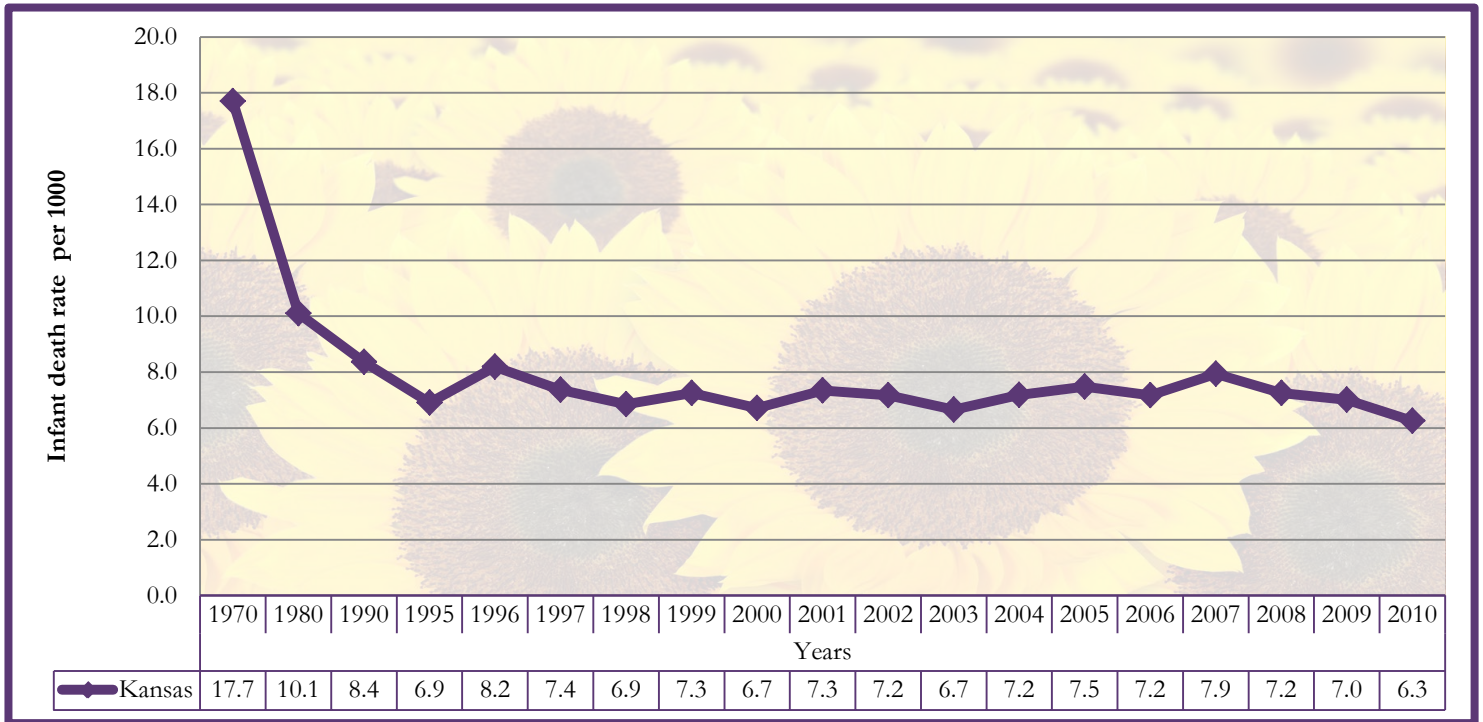

County data were gathered from 2003 through 2010. In 2010, the percent of children enrolled in the free and reduced school lunch program by county ranged from a low of 23.0% (Johnson) to a high of 77.7% (Wyandotte). See Appendix B4, p. 35 for individual county percentages. In 2010, the top 10 counties with the lowest percent enrollment in the free and reduced school lunch program were Johnson (23.0%), Kiowa (28.2%), Nemaha (28.2%), Sheridan (29.4%), Butler (29.8%), Leavenworth (31.4%), Douglas (32.4%), Trego (32.7%), Gove (35.1%), and Marion (35.2%). The average percent enrollment in the free and reduced school lunch programs for the top ten counties in 2011 was 30.5%, a 33.7% increase from the top ten county average of 22.9% in 2003.

HIGH SCHOOL DROPOUT

High School dropout rates in Kansas have declined from 3.0% in 1995 to 1.4% in 2010. This represents a 53% decrease in the high school dropout rate since 1995. County level data were obtained from 1995 to 2010. In 2010, the top ten counties with the lowest high school dropout rates were Morris (.20%), Norton (.20%), Ottawa (.30%), Pawnee (.30%), Phillips (.30%), Rice (.30%), Rooks (.30%), Cherokee (.40%), Clark (.40%), and Greenwood (.40%). See Appendix B5, p. 36 for individual county rates. In 2010, county dropout rates ranged from a low of .20% (Morris) to a high of 3.4% (Morton).

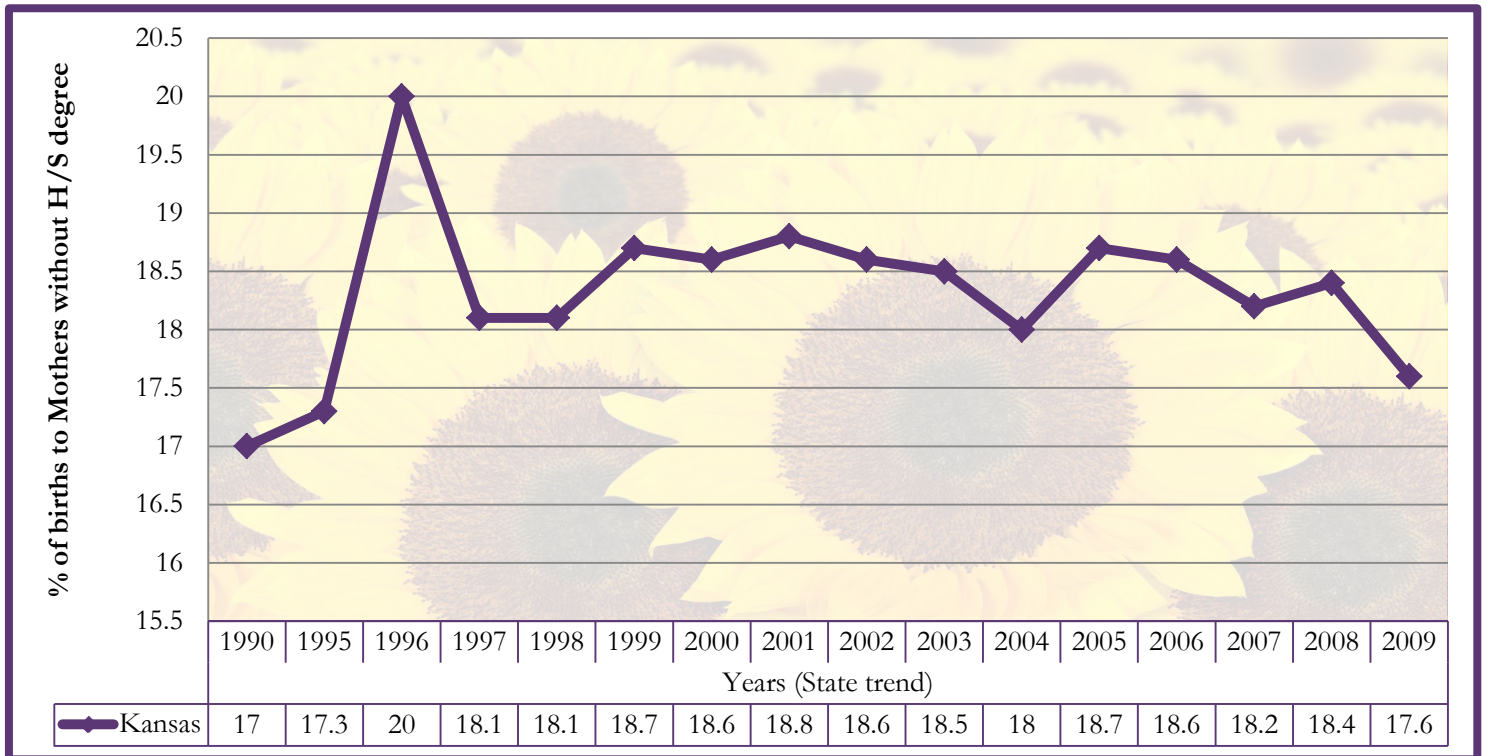

INFANT MORTALITY

Since 1970, the infant mortality rate in the state of Kansas has declined 64%. The state rate has fallen from 17.7 infant deaths per 1,000 live births in 1970 to 6.3 infant deaths per 1,000 live births in 2010, the lowest rate of infant mortality in Kansas for the years 1970 to 2010. There were a total of 253 infant deaths in the state of Kansas in 2010.

Individual county rates are reported in Appendix B6, p. 37. In 1970, the average rate of infant death for the ten counties with the highest infant mortality rate was 47.7 infant deaths per 1,000 live births. In 2010, the average rate of the highest ten counties was 29.5 infant deaths per 1,000 births, a 38% decrease in infant deaths among the bottom ten counties. In 2010, rates ranged from 0.0 to 43.5 infant deaths per 1,000 live births.

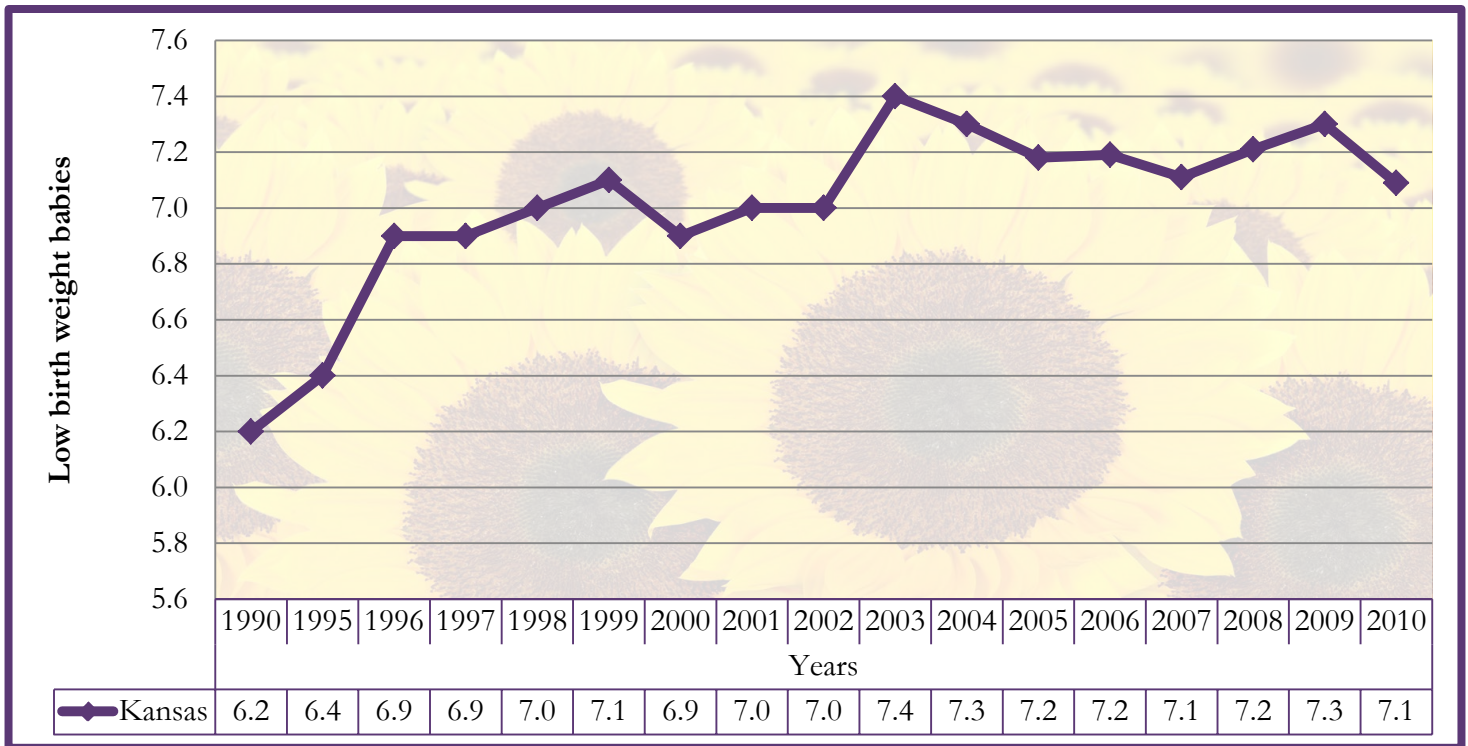

LACK OF MATERNAL EDUCATION

In 2009, the most recent available year with county level data, 17.6% of new mothers had not earned a high school diploma at the time of their child’s birth (as indicated on the child’s birth certificate). That is up slightly from 17.0% in 1990.

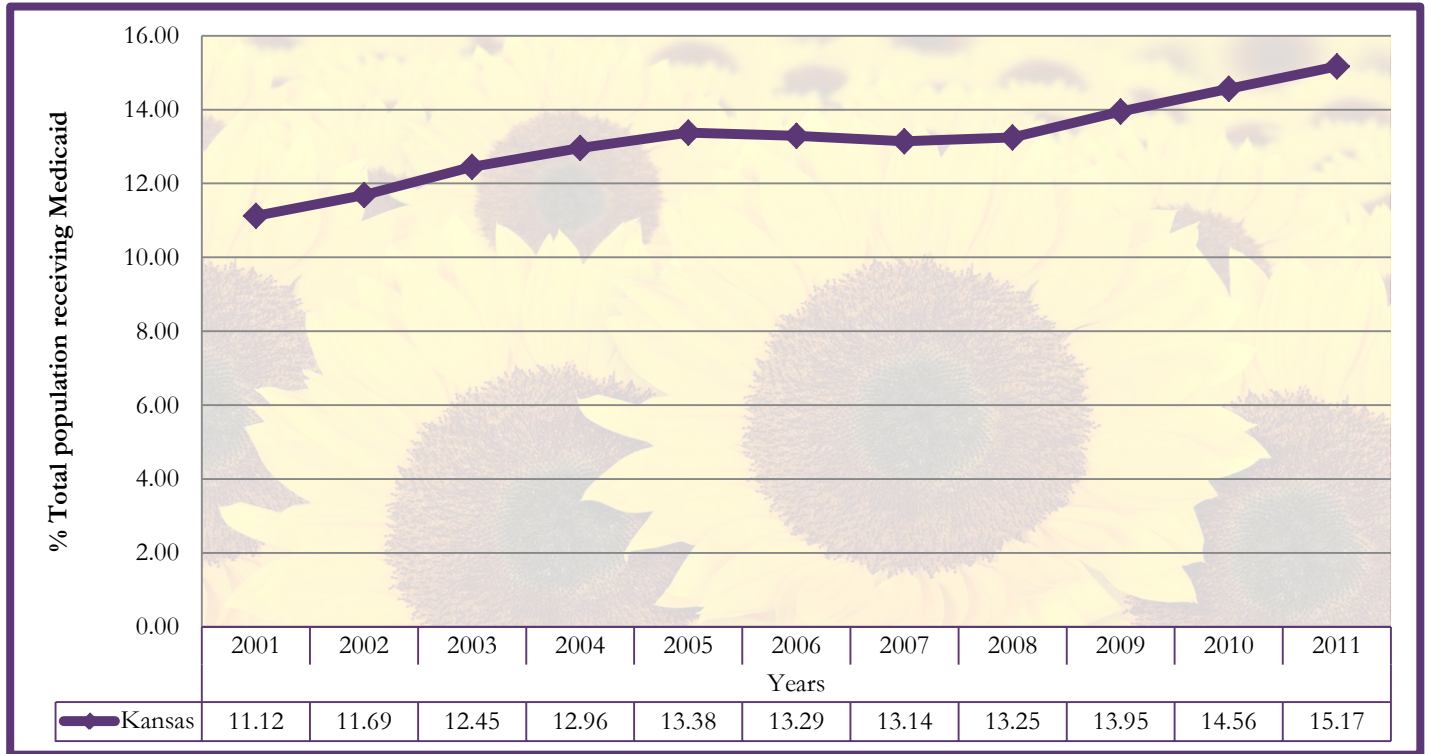

County level data were obtained from 1990 to 2009. In 2009, the percent of new mothers who had not earned a high school diploma at the time of their child’s birth ranged from a low of 0.0% (Wallace and Chase) to a high of 50.3% (Seward). See Appendix B7, p. 38 for individual county rates. In 2009, the top ten counties with the lowest rates were Wallace (0.0%), Chase (0.0%), Rush (3.2%), Jewell (3.9%), Ellsworth (4.0%), Norton (4.9%), Ness (5.7%), Nemaha (5.7%), Wabaunsee (6.0%), and Coffey (6.1%). The average percent of new mothers who had not earned a high school diploma at the time of their child’s birth for the top ten counties in 2009 was 4.0%, a 20% decrease from the top ten counties average of 5.0% in 1990.

LOW BIRTH WEIGHT BABIES

Since 1990, the percent of low birth weight babies has been increasing. In 2010, there were 2,867 low birth weight babies born in Kansas, or 7.1% of all births. This is a 14.5% increase in the number of low birth weight babies compared to 1990. County level data were obtained from 1990 to 2010. In 2010, level of low birth weight babies among counties ranged from a low of 0.0% (Greeley, Jewell, Ness, Sheridan, and Trego) to a high of 17.4% (Rawlins). See Appendix B8, p. 39 for individual county rates.

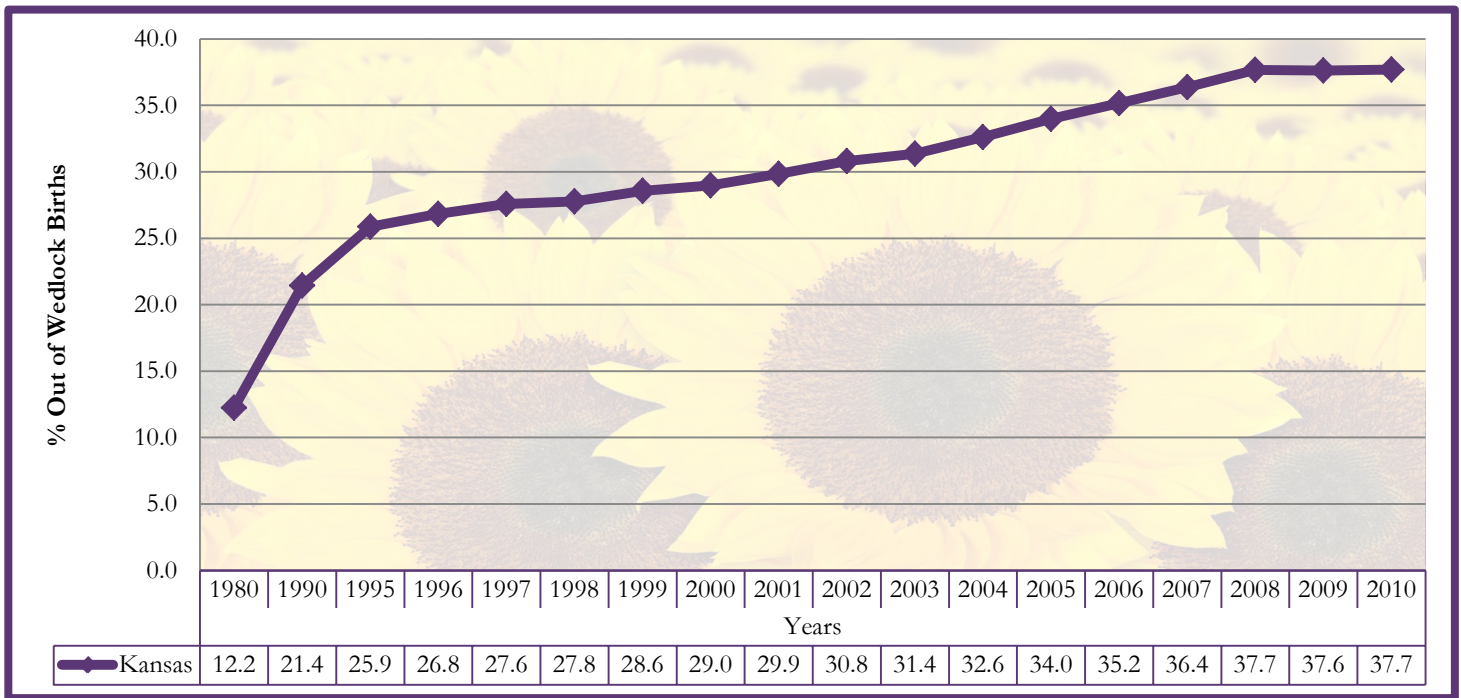

MEDICAID

Medicaid enrollment has risen in the past decade. In 2001, an average of 299,751 individuals registered for Medicaid benefits, or 11.1% of the population. In 2011, this number rose to 435,487 individuals or a rate of 15.2% of the population, a 37% increase.

County level data were obtained for the years 2001 to 2011. In 2011, the percent of the population enrolled in Medicaid by county ranged from 6.9% (Riley) to 28.2% (Wyandotte). In 2011, the top ten counties with the lowest Medicaid enrollment rate were Riley (6.9%), Sheridan (7.4%), Johnson (7.4%), Hodgeman (8.1%), Gove (8.5%), Lane (9.6%), Douglas (10.0%), Nemaha (10.1%), Pottawatomie (10.2%), and Wabaunsee (10.2%). The average Medicaid enrollment rate of the top ten counties in 2011 was 8.8%. In 2001, the average Medicaid enrollment rate of the top ten counties was 6.4%, a 37.5% increase in the past ten years. See Appendix B9, p. 40 for individual county rates.

OUT-OF-WEDLOCK BIRTHS

In 2010, 37.7% of all births in Kansas were to unmarried parents, compared to 12.2% of all births in 1980. This represents a 209% increase in the percent of Kansas babies born to unmarried parents. In 2010 the total number of births to unmarried parents was 15,241, an increase from 4,979 in 1980.

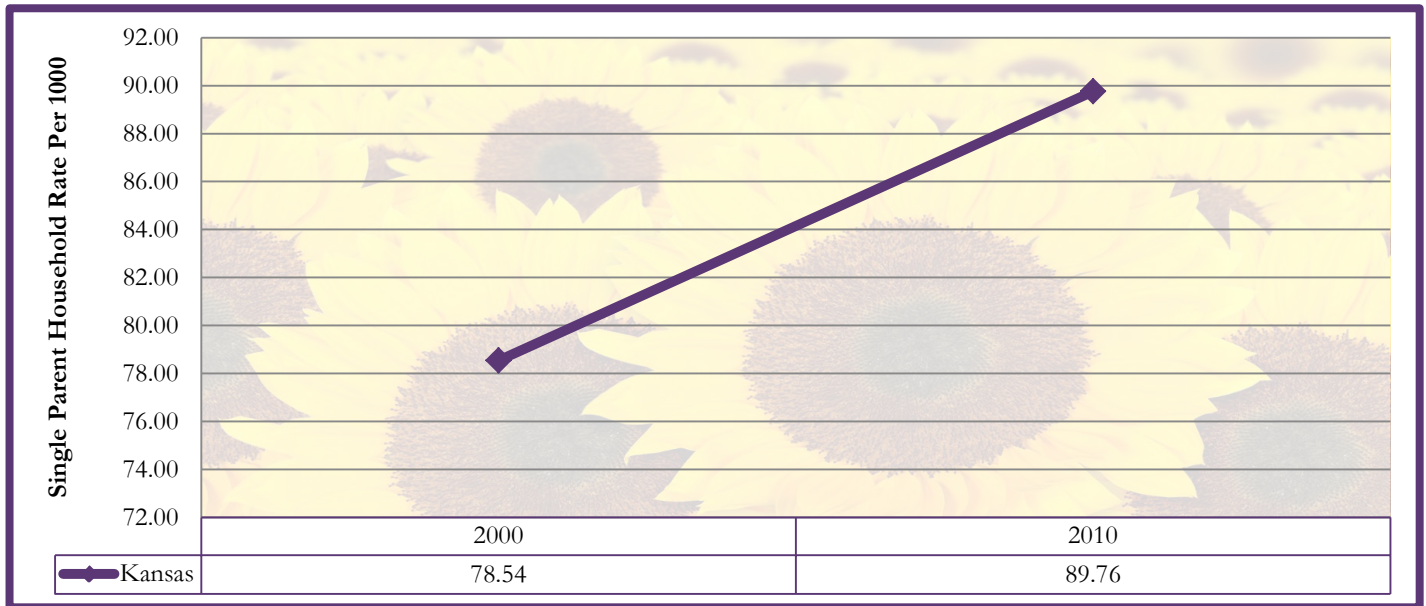

County level data were obtained from 1980 to 2010. In 2010, the percent of births to unmarried parents ranged from a low of 8.3% (Wallace) to a high of 60.0% (Comanche). See Appendix B10, p. 41 for individual county rates. In 2010, the top ten counties with the lowest percent of births to unmarried parents were Wallace (8.3%), Washington (10.5%), Lane (12.5%), Gray (14.9%), Riley (17.2%), Nemaha (17.6%), Kiowa (17.9%), Trego (18.5%), Pottawatomie (18.6%), and Graham (19.4%). The average percent of births to unmarried parents for the top ten counties in 2010 was 14.7%, a 765% increase from the top ten county average of 1.7% in 1980.

PARENTAL UNEMPLOYMENT

The reported state trend includes years not available at the county level but are reported in the graph to demonstrate the change in rates in recent years. County level data were obtained for 2000 and 2010. Individual county rates for 2010 are reported in Appendix B11, p. 41. In 2010, parental unemployment rates by county ranged from 0.0% (Comanche) to 15.5% (Barber). The top ten counties with the lowest parental unemployment rates were Comanche, Sheridan, Clay, Morton, Greeley, Trego, Chautauqua, Stevens (all at 0.0%), Logan (0.7%), and Meade (0.8%).

SINGLE PARENT HOUSEHOLDS

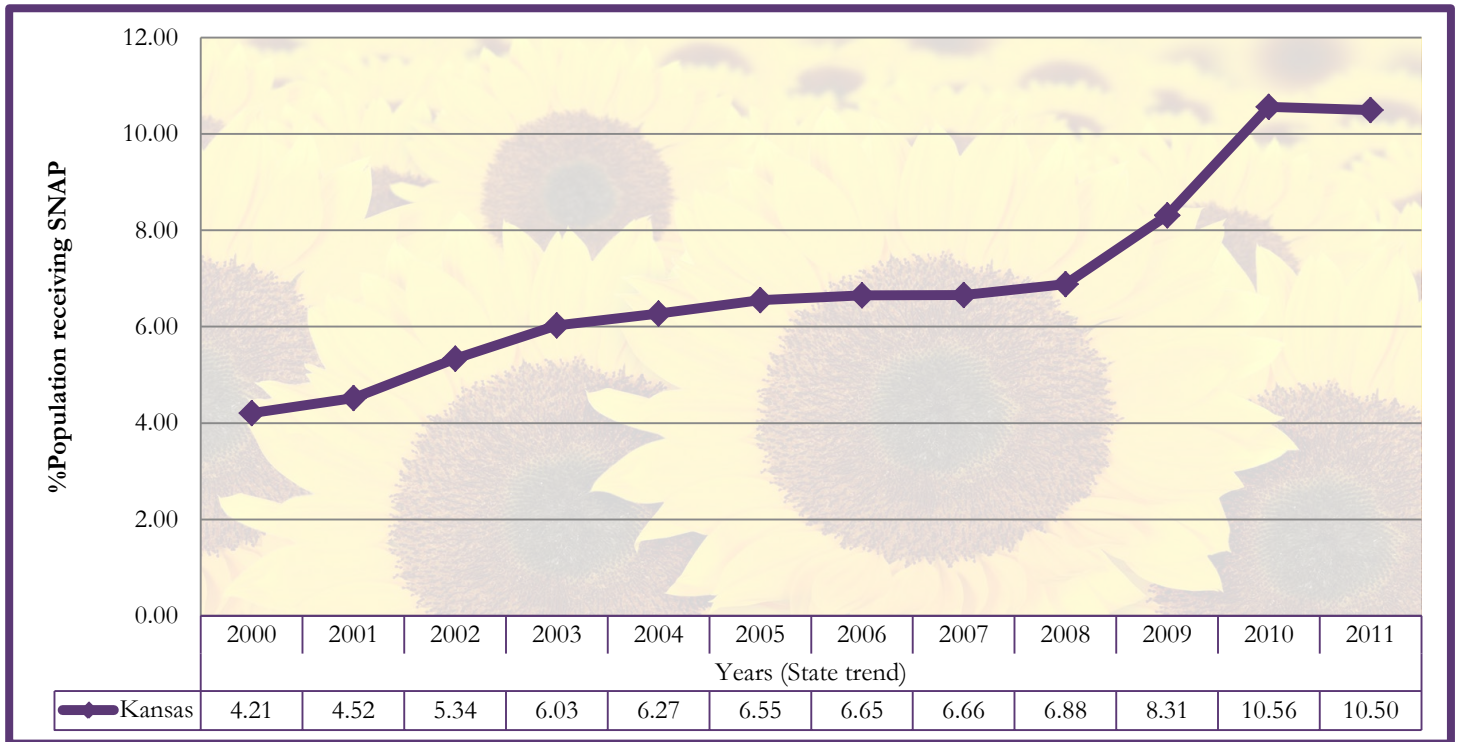

Single parent household Census data were available for the last two decades (2000 and 2010). The current sample includes rates per 1,000 households of single parent households with children under 18 living in the household. Data between the two time points indicates a 14% increase in the rate of single parent households from 2000 to 2010.

County level data were obtained for 2000 and 2010. In 2010, single parent household rates ranged from a low of 7.05 (Trego) to a high of 164.44 (Hamilton) per 1,000 households. See Appendix B12, p. 42 for 2010 individual county rates. In 2010, the top ten counties with the lowest rates of female headed households were Trego (7.05), Greeley (13.81), Scott (16.91), Wallace (17.12), Washington (22.04), Grove (26.23), Lane (30.38), Rush (32.04), Republic (34.92), and Stafford (45.16).

SNAP

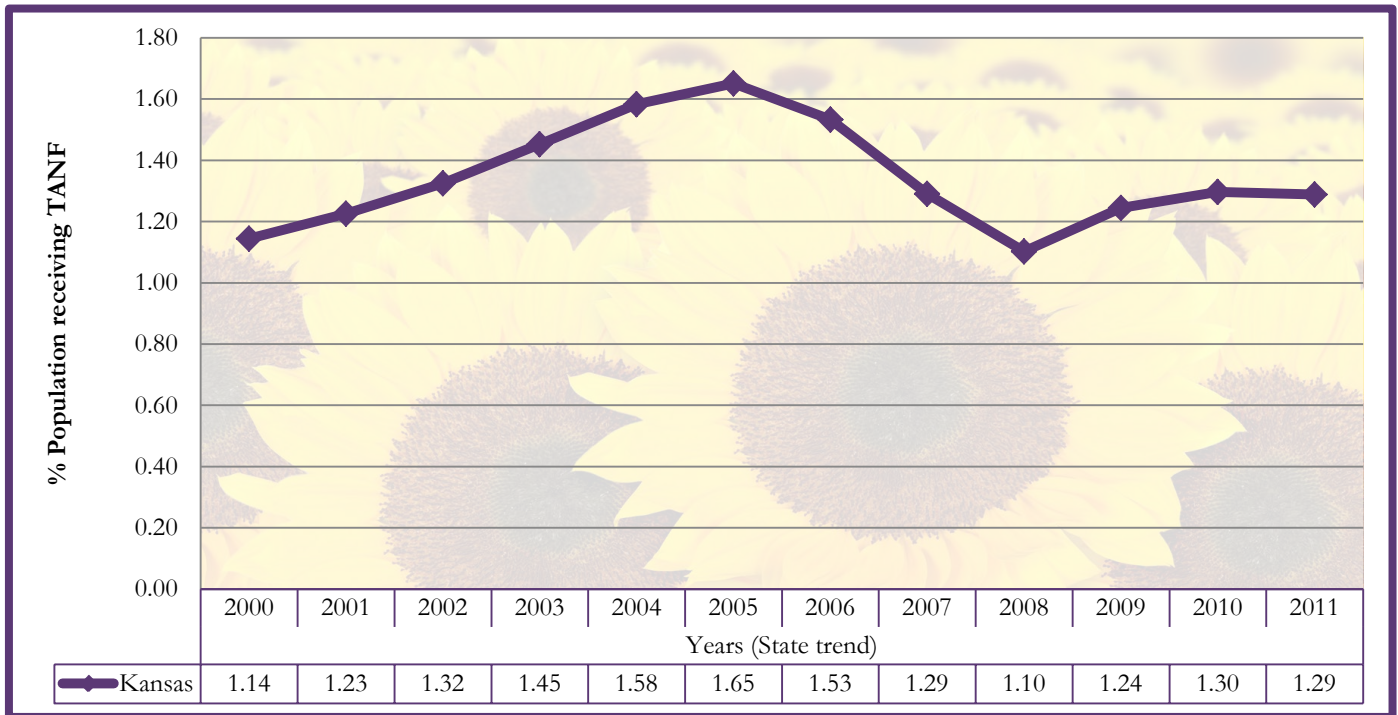

Supplemental Nutrition Assistance Program

SNAP enrollment in the state of Kansas has risen from 4.2% of the population or 113,083 individuals in 2000 to 10.5% of the population or 301,383 individuals in 2011, a 150% increase. County level data were obtained from 2000 to 2011. In 2011, county SNAP rates ranged from a low of 2.77% (Sheridan) to a high of 20.72% (Wyandotte). See Appendix B13, p. 43. In 2011, the top ten counties with the lowest SNAP rates were Sheridan (2.77%), Greeley (3.37%), Grove (3.63%), Johnson (4.08%), Nemaha (4.41%), Gray (4.42%), Riley (4.42%), Ness (4.49%), Rawlins (4.6%), and Wallace (4.76%). The average SNAP rate for the top ten counties in 2010 was 4% a 174% increase from the top ten county average of 1.46% in 2000.

TANF

Temporary Assistance for Needy Families

TANF enrollment in the state of Kansas has risen from 1.1% of the population or 30,755 individuals in 2000 to 1.29% of the population or 36,981 individuals in 2011, a 13% increase. In the last decade, the number of individuals receiving TANF benefits peaked in 2005 with a high of 45,308 individuals receiving benefits. County level data were obtained from 2000 to 2011. In 2011, county TANF rates ranged from a low of .13% (Sheridan) to a high of 3.67% (Wyandotte). See Appendix B14, p. 44. In 2011, the top ten counties with the lowest TANF rates were Sheridan (.13%), Comanche (.20%), Grove (.21%), Greeley (.23%), Nemaha (.24%), Rawlins (.25%), Morris (.25%), Kiowa (.37%), Harper (.39%), and Marshall (.41%). The average TANF rate for the top ten counties in 2010 was .25% a 39% increase from the top ten county average of .18% in 2000.

TEEN PREGNANCY

Since 1996, the overall teen pregnancy rate in Kansas—the number of pregnancies per 1,000 females age 10-19 has fallen by 10.8 percent. This represents a 32% decrease in the teenage pregnancy rate since 1996. The total number of pregnant teens decreased from 6,498 in 1996 to 4,501 in 2010.

In 2010, county teen pregnancy rates ranged from a low of 0 (Chautauqua, Cheyenne, Grove, Greeley, Kiowa, Lane, Sheridan) to a high of 52.3 (Woodson). See Appendix B15, p. 45. In 2010, the top ten counties with the lowest teen pregnancy rates were Chautauqua (0), Cheyenne (0), Grove (0), Greeley (0), Kiowa (0), Lane (0), Sheridan (0), Washington (2.92), Gray (3.88), and Logan (5.95). The average rate of teen pregnancy for the top ten counties in 2010 was 1.3 per 1000 females age 10-19 an 87% decrease from the top ten county average of 10.1 in 1996.

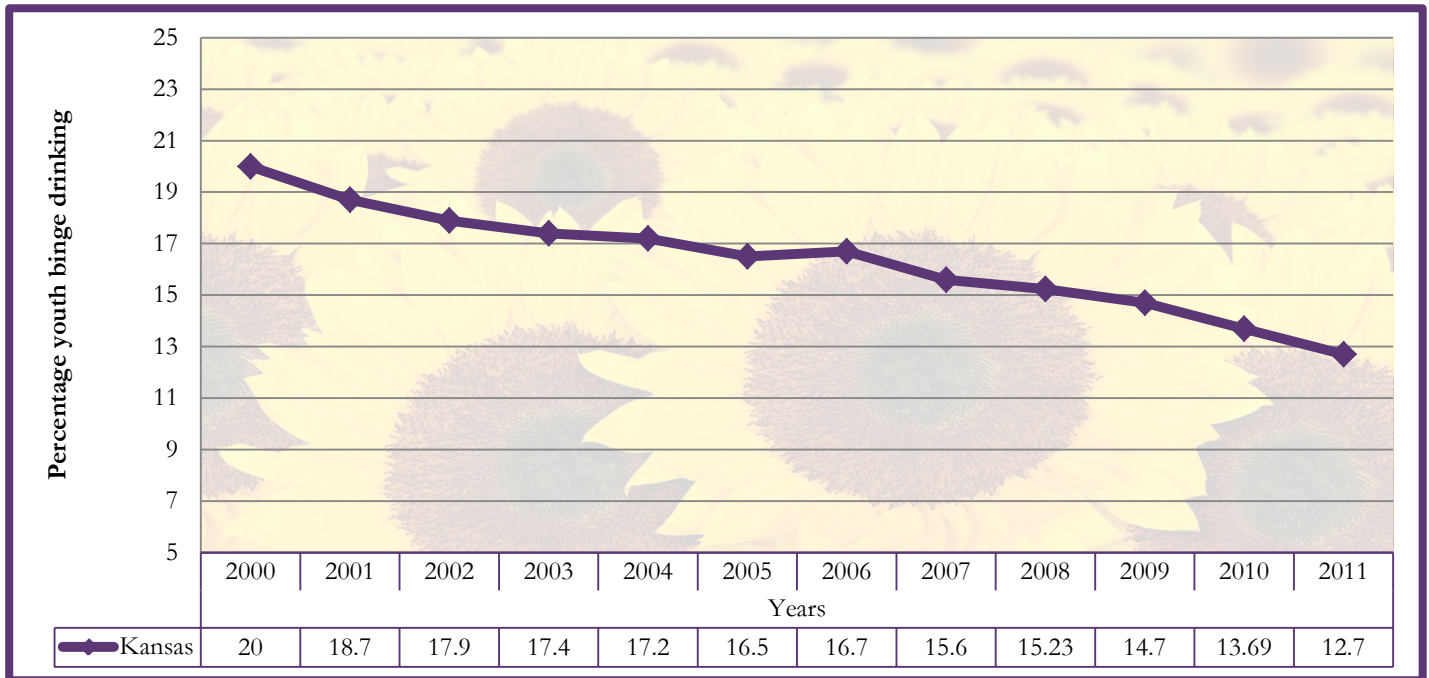

UNINSURED CHILDREN

The rates of uninsured children have remained steady from 2000 to 2010, however, caution should be used when comparing rates of uninsured children as “children” was defined as “under age 18” in 2000, but “under age 19” for 2006-2010.

County level data were obtained from 2000 and 2010. In 2010, rates of uninsured children by county ranged from a low of 5.2% (Leavenworth) to a high of 20.1% (Hamilton). See Appendix B16, p. 46 for individual county rates. In 2010, the top ten counties with the lowest rates of uninsured children were Leavenworth (5.2%), Johnson (5.5%), Geary (6.4%), McPherson (6.4%), Butler (6.8%), Ellis (6.8%), Franklin (6.8), Atchison (7.2%), Riley (7.2%), and Pottawatomie (7.3%). The average rate of uninsured children for the top ten counties in 2010 was 6.6% which is comparable to the top county average of 6.4% in 2000 reflecting the state trends constancy over the last 10 years.

YOUTH BINGE DRINKING

Youth binge drinking in the state of Kansas has declined 36.5% since 2000. In 2011, 12.7% of Kansas youth reported binge drinking, down from a high of 20% of Kansas teens in 2000. All available county level data were gathered and reported from 2000 to 2011. In 2011, Kansas county level data on youth binge drinking ranged from a low of 4.7% (Graham) to a high of 21.6% (Morton). See Appendix B17, p. 47 for individual county percentages. In 2011, the top 10 counties with the lowest youth binge drinking percentage were Graham (4.7%), Coffey (6.0%), Gray (6.3%), Geary (7.0%), Sherman (7.9%), Jewell (8.0%), Logan (8.8%), Leavenworth (9.1%), Cherokee (9.2%), and Greeley (9.4%). The average percent of youth binge drinking for the top ten counties in 2011 was 7.6%, a 26.5% decrease from the top ten county averages of 10.4% in 2000.

YOUTH TOBACCO USE

Youth tobacco use in the state of Kansas has declined 53% since 1998. In 2011, 11.8% of Kansas youth reported using tobacco, down from a high of 25.3% of Kansas youth in 1998. All available county level data were gathered and reported from 1998 to 2011. In 2011, Kansas county level data on youth tobacco use ranged from a low of 2.4% (Edwards) to a high of 23.8% (Woodson). See Appendix B18, p. 48 for individual county percentages. In 2011, the top 10 counties with the lowest youth tobacco use were Edwards (2.4%), Gray (2.5%), Wallace (6.5%), Douglas (7.0%), Coffey (8.0%), Riley (8.4%), Kearny (8.6%), Geary (8.8%), Logan (8.8%), and Lyon (9.2%). The average percent of youth tobacco use for the top ten counties in 2011 was 7.0%, a 3.0% decrease from the top ten county average of 7.2% in 2000.

APPENDIX A.

| Indicator of Family/Child Well-being | Definition | Source |
|--------------------------------------|--|---|
| Child Care Assistance | The average number of individuals per month receiving Child Care benefits out of the total population. | Kansas Department for Children and Families |
| Child Poverty | The estimated percent of children under the age of 18 living in families with incomes below 100% of the U.S. poverty threshold. | U.S. Census Bureau Small Area Income and Poverty Estimates |
| Divorce | The total number of divorces and annulments out of total population times 1000. | Kansas Department of Health and Environment |
| Free and Reduced Lunch Enrollment | Enrollment represents school total headcount enrollment as of September 20 th of each year | Kansas State Department of Education & KIDS Count |
| High School Dropout | Yearly total dropouts divided by the total enrollment of grades 7-12. Dropouts are not synonymous with “not graduating.” Refer to source for additional information. | KS Individual Data on Students System & Principal’s Building Report, Kansas State Department of Education |
| Infant Mortality/Deaths | The death of a live-born infant that occurs within the first year of life. Rate is calculated by the number of infant deaths divided by the number of live births times 1000. | Kansas Department of Health and Education & KIDS Count |
| Lack of Maternal Education | The percentage of live births to mothers who have not received a high school degree, as indicated on the child’s birth certificate out of total live births. | Kansas Department of Health and Environment & KIDS Count |
| Low Birth Weight Babies | The percentage of live births weighing less than 5.5 pounds out of total live births. | KIDS Count & Kansas Department of Health and Environment |
| Medicaid | The unique (unduplicated) number of individuals that received Medicaid benefits out of the total population. | Kansas Department for Children and Families |
| Out of Wedlock Births | A birth occurring to a mother who is not married at the time of conception or at the time of the birth or any time between conception and birth. Calculated rate by taking the total number of out of wedlock births divided by total live births times 100. | Kansas Department of Health and Environment |

KANSAS CHILD & FAMILY WELLBEING INDICATORS

| | | |
|--|--|---|
| Parental Unemployment | Percentage of families where no parent has a full-time, year-round employment. Calculated rate by taking parent(s) not in labor force divided by families and subfamilies with own children under the age of 18 times 100. | U.S. Census Bureau, Bureau of Labor Statistics |
| Single Parent Households | Households with only one parent present with own children divided by the total number of households times 1000. | U.S. Census Bureau, Housing and Families |
| SNAP (Supplemental Nutrition Assistance Program) | The average number of individuals per month receiving SNAP benefits out of the total population. | Kansas Department for Children and Families |
| TANF (Temporary Assistance for Needy Families) | The average number of individuals per month receiving TANF benefits out of the total population. | Kansas Department for Children and Families |
| Teen Pregnancy | The total number of live births, still births, and abortions to females ages 10-19 divided by total population of females ages 10-19 times 1000. | Kansas Department of Health and Environment |
| Uninsured Children | The number of uninsured children* out of the total population of children. *Children was defined as “under age 18” in 2000, but “under age 19” for 2006-2010. | U.S. Census Bureau, Small Area Health Insurance Estimates |
| Youth Binge Drinking | The percentage of youths in grades 6,8,10, and 12 who reported taking 5 or more consecutive drinks on at least one occasion in the 2 weeks prior to completing the Communities that Care Survey on substance use and other social behaviors. | KIDS Count & Southeast Kansas Education Service Center |
| Youth Tobacco Use | The percentage of youth in grades 6, 8, 10, and 12 who reported using tobacco products (cigarettes or smokeless tobacco) in the 30 days prior to completing the Communities that Care Survey on substance use and other social behaviors. | KIDS Count & Southeast Kansas Education Service Center |

KANSAS CHILD & FAMILY WELLBEING INDICATORS

APPENDIX B.

Individual county rankings for the most recent available year. Rankings in tables using 2009/2010 data may be different from those reported in the composite index due to rounding.
