Public Hearing	March 2016	
Prepare Concise Explanatory Statement	March 2016	
File CR-103	April 2016	
Rule Effective	May 2016	

Purpose

The State Board of Health (Board) is considering changing the optimal fluoride level in drinking water for those Group A public water systems that fluoridate. This change is based on the final recommendation from the U.S. Department of Health and Human Services.

Recent Issues and Activities

The Department of Health (Department) is holding an informal comment period on the draft rule in August.

Next Steps

The Department will evaluate comments and finalize the rule language in September, and begin drafting the analyses. The Board plans to hold a formal public hearing in March 2016.
